

The face of a
new generation in
commercial vehicle bodies

BODYCAB[®] Ravi

14 YEARS OF
INNOVATION
& SUCCESS
2000-2014

Saves Fuel | Light Weight | Aerodynamic | Stylish | Rattle Free | Rust Free | Mounts on Original Fittings

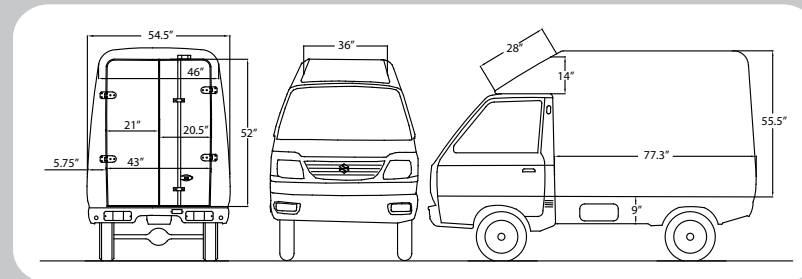

salient features

- BODYCAB is two times lighter in weight as compared to conventional metal body
- Our computer-optimised aerodynamic shape slices through wind and reduces drag to save precious fuel
- Life time rust-proof because of using the best plastic and fibre reinforced composites
- Built-in wind deflector to reduce aerodynamic drag and side bumper skirts to cover the leaf spring and battery
- High Quality Composites, high-end Palatal P5 from BASF & Gelcoat ensure Class A automotive finish
- Owen Corning Glassfiber Materials from USA
- High quality 2K PU based Standox German paint (long-lasting as the original paint on vehicles)
- Galvanized Plated anti-roll over cage (skeleton frame) for reinforcing safety in case of a roll-over
- German Galvanized Ellen Key Type Fasteners
- Rubber Sealing for Doors (water-proof body option)
- Steel reinforced inner frames for added strength
- Sturdy galvanised imported locks & hinges
- Fixed by fasteners/easy snap-on system, hence easily removable from vehicle at any time for easy placing on any other new vehicles of the same make. Standard units available for Hyundai Shehzore, Toyota Hilux (twin & single cab), Suzuki Ravi pickup and Mazda T3500 truck.
- Special units for any model of commercial vehicle could be developed
- We also provide complete graphics printing, deigning and pasting services in collaboration with 3M Scotch print graphics giving you complete hassle-free one-window solution.
- High strength doors to withstand repeated use (courier, delivery, distribution services, etc.)
- Long-lasting, durable, and rust free for life.

RAVI Sporty

RAVI Standard

save fuel and cut down on your operating costs!

The sleek, aerodynamically styled body with its smooth Class-A automotive finish reduces air drag and allows your vehicle to cut through the oncoming wind resistance. Our large fleet customers reported more than 15-20% drop in fuel expenses
